Toll Blending

US MIX Co.

Toll Blending

...we make it happen.

You have the idea...

> As companies grow, their product lines diversify and become attractive to customers at all points on the map. **To expand their business geographically** and to continue presenting competitive pricing to clients in new markets, these companies **must lower the freight factor.**

To accomplish this goal, **toll manufacturing** is the vehicle to enter a region with significant **cost advantage over competitors** who must ship from out of the area.

> **US MIX Co.** is in a unique position to offer its services as a toll manufacturer. We are experienced in the seller/blender relationship and can cater a partnership package to meet your business goals. US MIX has expertise in the packaging of all types of powders and liquids. We currently blend and package for over 25 unique companies. US MIX provides:

- inventory management
- research and development
- quality control testing
- warehousing
- transportation
- rail access

Companies seeking to distribute to the western United States, or any business with the idea, but not the production capabilities will find a discreet, professional partner in **US MIX Co.**
